DETAILED ACTION

1. This communication is responsive to amendments filed on 01/31/2007.

Reasons for Allowance

2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1,9, and 10 are allowable over the prior art of record, because the prior art of record does not disclose that "that the controller (1) compares a first lock/unlock state detected by the door lock state detector during the door open state with a second lock/unlock state detected by the door lock state detector at a moment when an open/close state is changed from an open state to a closed state; (2) to maintain the state of the door lock mechanism when the first lock/unlock state equals to the second lock/unlock state; and (3) to set the state of the door lock mechanism at the first lock/unlock state when the first lock/unlock state does not equal to the second lock/unlock state". Along with the remaining features of the claim.
